

## pillow bags

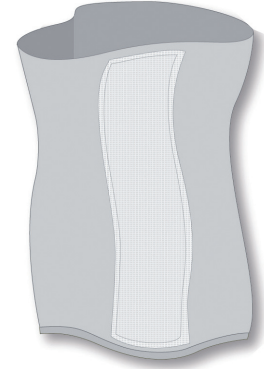

Bags designed for the production of mycelium and organisms used in biocontrol. (entomopathogenic fungi, nematodes, filamentous fungi with fungicidal action, etc). UNICORN manufactures all its bags and filters

These bags are manufactured in both PP and PE.

This type of bags are manufactured in various sizes and with various types of Filters.

Pillow bags in PP are usually filled between 50%- 60% of their volume, then the upper part of the bag is folded and sterilized. After cooling, the bags are opened under a stream of filtered "clean" air (laminar flow) and the inoculum is introduced into the bag. The bag is then sealed and shaken to mix the mycelium with the substrate. The bags are now ready for incubation.

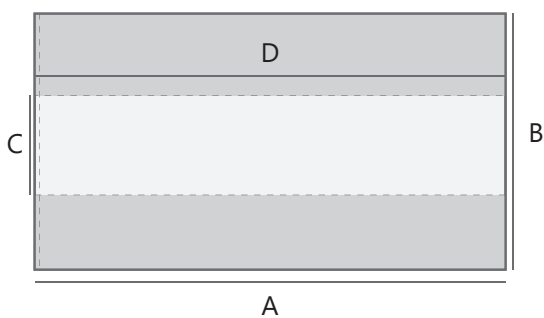

The Pillow bags in PE are filled to 100% of their capacity, in this case sterilization is carried out by irradiation (gamma rays).

## MODELS

### UNISTRIP 1

This type of bag is manufactured in two sizes (48 x 35,5cm y 61 x 35,5cm)

**material:**

PP (Polypropylene) or PE (Polyethylene)

**filter type:**

A Filter, B Filter , T Filter or TV Filter

**type of perforation:**

L Hole (unique perforation)

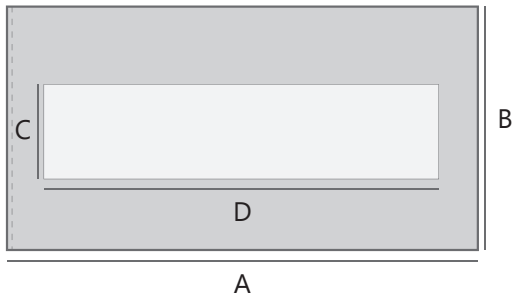

Pin Hole (small and multiple perforations)

	A		B		C		D	
Unistrip 1	48	19	35,5	14	6,3	2,5	48	19
Unistrip 1	61	24	35,5	14	6,3	2,5	61	24
	cm	inch						

## UNISTRIP 2

This type of bag is manufactured in two sizes (48 x 35,5cm y 61 x 35,5cm)

**material:**

PP (Polypropylene) or PE (Polyethylene)

**filter type:**

A Filter, B Filter, T Filter or TV Filter

**type of perforation:**

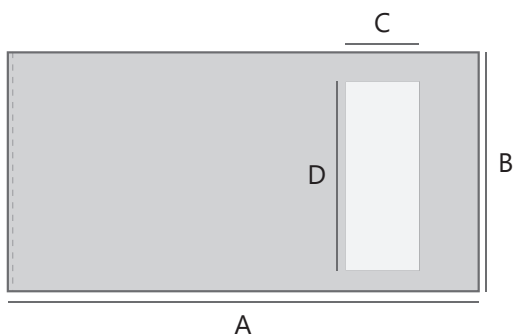

L Hole (unique perforation)

Pin Hole (small and multiple perforations)

	A		B		C		D	
Unistrip 2	48	19	35,5	14	6,3	2,5	33	13
Unistrip 2	61	24	35,5	14	6,3	2,5	46,7	18
	cm	inch						

## UNISTRIP 3

This type of bag is manufactured in a single size

**material:**

PP (Polypropylene) or PE (Polyethylene)

**filter type:**

A Filter, B Filter, T Filter or TV Filter

**type of perforation:**

L Hole (unique perforation)

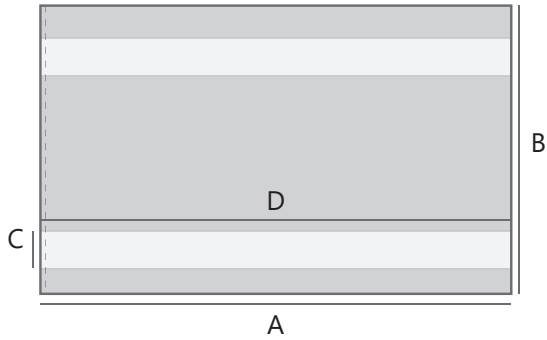

Pin Hole (small and multiple perforations)

	A		B		C		D	
Unistrip 3	60	23,5	35,5	14	7	2,7	30	12
	cm	inch						

## MULTISTRIP 11

This type of bag is manufactured in two sizes (47 x 35,5cm y 61 x 35,5cm)

**material:**

PP (Polypropylene) or PE (Polyethylene)

**filter type:**

In PP bags: A Filter,  
In PR bags: TV Filter

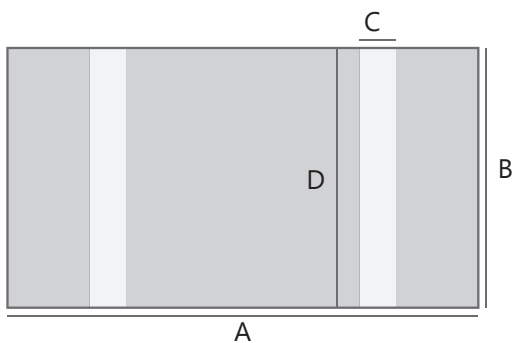

**type of perforation:**

Pin Hole (small and multiple perforations)

	A		B		C		D	
Multistrip 11	48	19	35,5	14	2,5	1	48	19
Multistrip 11	61	24	35,5	14	2,5	1	61	24
	cm	inch						

## MULTISTRIP 12

This type of bag is manufactured in a single size

**material:**

PP (Polypropylene) or PE (Polyethylene)

**filter type:**

In PP bags: A Filter,  
In PR bags: TV Filter

**type of perforation:**

Pin Hole (small and multiple perforations)

	A		B		C		D	
Multistrip 12	33	13	18	7	2.5	1	18	7
	cm	inch
